

Treppner Correspondence Course – Individual Cards Explained – Part 2

At this time I will present all of the cards to you in detail, although one could certainly go on and on about the thematic cards and their meanings. For the time being, I will limit myself to the old standards, that way, the beginners will have sufficient learning material. However, the professionals among you will surely be able to come across a new tip or two. For each card, there are eight categories for their description:

1. Key Words

The terms most commonly associated with a card will be listed here. The primary meaning is written in CAPITAL letters, making it easy to spot.

2. General Description

Here is where you'll find the description of how a card is mainly used and what you have to look out for when interpreting it. This is just an overall summary of the card—the many, smaller intricacies may only be mentioned briefly, as it would take too long to get into all of them. Also, this way you won't get too mentally overloaded.

3. Love

This category should be seen as a short question – receiving a quick answer or used for a daily overview. Sometimes multiple messages are revealed, in which case you have to filter out what is true. Because most people use the cards to ask about love, I gave this topic a brief and separate treatment.

4. Career

This is also only a short description, dealing with possible vocation fields, as this could also turn into too much of a multilayered section. Again, this can also be used to glean quick answers or discover your daily oracle in matters relating to work and career.

5. Characteristics/Qualities

The main characteristics/qualities of a card will be addressed, so that you can get an idea what types of people can be referred to when interpreting a particular card.

6. Medicine

Under this heading, you will find the classic medical interpretations of the cards, but it is only to be used as a reference and not to replace a visit to the doctor.

7. Timing Guide

Each card carries a timing factor within it. This will be mentioned only briefly. The usage and determination of symbols referring to time will be explained later using different methods.

8. Astrological Correspondence
